

Johnsen Animal Hospital
Anesthesia and Surgery Release Form

Date: _____

Owner's Name: _____ Pet's Name: _____

Pet's current medications (including over-the-counter medications given within the last 2 weeks):

Your pet is in for a surgical procedure requiring anesthesia. We want to offer you the best service possible. Although we do not anticipate any problems, there is always some risk involved with an anesthetic procedure. In order to help lower the risks involved with anesthesia, pre operative blood screens, x-rays, and other testing is recommended. These may help rule out pre-existing medical problems that may not be evident on physical exam. \

Appropriate pain medication will be administered to your pet during the procedure and in most cases a supply of pain medication will be sent home at discharge to help keep your pet comfortable. The price for this pain medication is included in the surgery/anesthesia fee.

The following services are at an additional fee to the surgery and anesthesia. Some services are required for certain pets depending on their size, age, medical history and procedure being performed. Otherwise, services are recommended but optional.

PRE-OPERATIVE PHYSICAL EXAM is required if we have not examined your pet within the last 12 months, but is recommended for all pets. \$35 ____ yes ____ no

PRE-OPERATIVE BLOOD SCREEN to test kidneys, liver, blood sugar, white blood cells for infection, platelets for clotting, etc. This test is highly recommended for all pets, and required for pets 8 years of age and older, pets with a history of chronic organ dysfunction, and pets on long term medications (e.g. pain medication) who have not had recent blood work. The fee for this is \$90 ____ yes ____ no

FIV/FelV test, if it has not already been done, is recommended for cats/kittens for \$45 ____ yes ____ no

HEARTWORM testing is recommended for puppies/dogs 7 months of age and older who are not current on heartworm testing or prevention \$20 ____ yes ____ no

TICK DISEASE SCREENING is recommended for dogs, especially if they have ever had even a single tick \$45 ____ yes ____ no

CHEST X-RAYS are recommended for all pets, especially those 8 years of age and older \$130 ____ yes ____ no

ADD-ON DENTAL CLEANING: Your pet may need a dental cleaning to treat/prevent periodontal disease. As time allows, we may be able to clean your pet's teeth while having another procedure performed at a rate of \$100. Please see dental release form for additional pricing and information. ____ yes ____ no.

IV FLUIDS are highly recommended during the surgical procedure to maintain hydration and blood pressure. Fluids are required in dogs under 5 lbs, pets under 6 months of age, pets over 8 years of age, and pets with a history of kidney disease, pancreatitis, Addison's disease, or recent dehydration. A fee of \$65 will apply. ____ yes ____ no

E-COLLARS are recommended to prevent chewing/licking of the incision/sutures. If an animal chews out his/her sutures, an anesthesia fee plus additional surgical repair fees, antibiotics and e-collar charges will apply. E-collars are required for surgeries involving the feet or genital region. E-collars are \$\$\$ ____ yes ____ no.

POST-OP LASER THERAPY TREATMENT: A laser therapy treatment may be given at the surgery site while your pet is recovering from anesthesia. This treatment has been shown in pets and people to reduce pain and inflammation, as well as speed healing. Post-op laser therapy is \$30 ____ yes ____ no

ANTI-NAUSEA MEDICATION: A Cerenia injection may be given before surgery to help reduce post-operative nausea associated with anesthesia. Studies show that animals treated with Cerenia before anesthesia have reduced vomiting and return to normal eating faster. The prices for a pre-anesthetic Cerenia injection are as follows:

< 20 lbs	\$20	61-80lbs	\$50
20-40lbs	\$30	81-100lbs	\$60
41-60lbs	\$40		

Pre-anesthetic Cerenia injection for nausea ____ yes ____no

NAIL TRIM: While your pet is asleep, we can perform a nail trim at 50% off, for a final price of \$8 ____ yes ____ no

**FLEA & TICK TREATMENT/PREVENTION
(PRICE VARIES DEPENDING ON THE WEIGHT OF YOUR PET)**

During your pet's stay, Johnsen Animal Hospital reserves the right to administer flea & tick medication should any parasites be found on your pet during their stay here. It will be your responsibility to pay for this medication at the time of pick up.

Owners Initials: _____

LIFE SAVING MEASURES

We do everything possible to ensure the health and safety of your pet during their stay. However, should any complications occur, life-saving medications, procedures, or other measures may be needed. Such interventions are often required immediately before owner notification or permission can be specifically obtained. In such an event, your signature below gives us consent to intervene with life saving measures if needed and acknowledges your financial responsibility for this intervention.

I understand that all anesthetic procedures have possible risks, and that with all surgical procedures results cannot be guaranteed.
